Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 June 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1,2,4, 7-11,20-23,26 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Erkfritz ('187).

Erkfritz discloses a toolholder, comprising: a body portion; a plurality of support member assemblies mounted to the body portion, each support member assembly including a bore; and a plurality of insert-receiving cartridges, each cartridge including a shank capable of being removably received in a bore of the support member assembly by an actuator bolt and an actuator nut, each insert-receiving cartridge including a pocket for receiving a cutting insert, wherein rotation of the actuator bolt causes the insert-receiving cartridge to be secured to or removed from the support member; wherein the support member assembly is radially mounted on a side periphery of the body portion; and wherein the toolholder includes a plurality of support member assemblies and a corresponding number of insert-receiving cartridges and cutting inserts.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3722

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3,5,6,12,13-19,24 and 25 rejected under 35 U.S.C. 103(a) as being unpatentable over Erkfriz ('187).

With respect to claims 3,12 and 18 it would have been obvious to one having ordinary skill in the art at the time the invention was made to locate the elements in the claimed manner since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70. It appears that there would be no new or unexpected result from such a modification.

With respect to claims 5,6,13,14-17,19,24 and 25 it would have been an obvious matter of design choice to make the different portions of the assembly of whatever form or shape was desired or expedient. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47. It appears that there would be no new or unexpected result from such a modification.

Response to Arguments

Applicant's arguments filed 6/18/07 have been fully considered but they are not persuasive.

The examiner submits that, Erkfritz discloses a plurality of cartridges 75, 76 and 77 for supporting inserts 45, 46 and 47, Each cartridge comprises a block-like member of rectangular cross-section and is formed with a generally flat pocket 80 that extends tangentially of the disk 40. A shank 81 formed on the trailing wall of the cartridge fits into a keyway 83 cut in the rear wall of the recess 79 to locate the cartridge accurately in the recess.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
